

ionic 下拉刷新

在加载新数据的时候，我们需要实现下拉刷新效果，代码如下：

实例

HTML 代码

```
<body ng-app="starter" ng-controller="actionsheetCtl" >
  <ion-pane>
    <ion-content >
      <ion-refresher pulling-text="下拉刷新" on-refresh="doRefresh()"></ion-refresher>
      <ion-list>
        <ion-item ng-repeat="item in items" ng-bind="item.name"></ion-item>
      </ion-list>
    </ion-content>
  </ion-pane>
</body>
```

JavaScript 代码

```
angular.module('starter', ['ionic'])

.run(function($ionicPlatform) {
  $ionicPlatform.ready(function() {
    // Hide the accessory bar by default (remove this to show the accessory bar above the keyboard
    // for form inputs)
    if(window.cordova && window.cordova.plugins.Keyboard) {
      cordova.plugins.Keyboard.hideKeyboardAccessoryBar(true);
    }
    if(window.StatusBar) {
      StatusBar.styleDefault();
    }
  });
});

.controller( 'actionsheetCtl',['$scope','$timeout' , '$http',function($scope,$timeout,$http){

  $scope.items=[
    {
      "name": "HTML5"
    },
    {
      "name": "JavaScript"
    }
  ]
})
```

```
    },
    {
      "name": "Css3"
    }
  ];

  $scope.doRefresh = function() {
    $http.get('http://www.runoob.com/try/demo_source/item.json') //注意改为自己本站的地址，不然会有跨
域问题
      .success(function(newItems) {
        $scope.items = newItems;
      })
      .finally(function() {
        $scope.$broadcast('scroll.refreshComplete');
      });
  };
})
```

item.json 文件数据：

```
[
  {
    "name": "菜鸟教程"
  },
  {
    "name": "www.runoob.com"
  }
]
```

尝试一下 »

效果如下所示：

HTML5
JavaScript
Css3
