

```

        type: 'combobox',
        options: {
            valueField: 'productid',
            textField: 'name',
            data: products,
            required: true
        }
    },
    {
        field: 'listprice', title: 'List Price', width: 80, align: 'right', editor: { type: 'numberbox', options: { precision: 1 } },
        field: 'unitcost', title: 'Unit Cost', width: 80, align: 'right', editor: 'numberbox',
        field: 'attr1', title: 'Attribute', width: 150, editor: 'text',
        field: 'status', title: 'Status', width: 50, align: 'center',
        editor: {
            type: 'checkbox',
            options: {
                on: 'P',
                off: ''
            }
        }
    },
    {
        field: 'action', title: 'Action', width: 70, align: 'center',
        formatter: function (value, row, index) {
            if (row.editing) {
                var s = '<a href="#" onclick="saverow(this)">Save</a> ';
                var c = '<a href="#" onclick="cancelrow(this)">Cancel</a>';
                return s+c;
            } else {
                var e = '<a href="#" onclick="editrow(this)">Edit</a> ';
                var d = '<a href="#" onclick="deleterow(this)">Delete</a>';
                return e+d;
            }
        }
    }
],
onBeforeEdit: function (index, row) {
    row.editing = true;
    updateActions(index);
},
onAfterEdit: function (index, row) {
    row.editing = false;
    updateActions(index);
},
onCancelEdit: function (index, row) {
    row.editing = false;
    updateActions(index);
}
});

```

```
});  
function updateActions(index){  
    $('#tt').datagrid('updateRow',{  
        index: index,  
        row:{}  
    });  
}  
}
```

为了启用数据网格行内编辑，您应该添加一个 `editor` 属性到列中。编辑器（`editor`）会告诉数据网格（`datagrid`）如何编辑字段及如何保存字段值。正如您所看到的，我们定义三个编辑器（`editor`）：`text`、`combobox` 和 `checkbox`。

```
function getRowIndex(target){  
    var tr = $(target).closest('tr.datagrid-row');  
    return parseInt(tr.attr('datagrid-row-index'));  
}  
function editrow(target){  
    $('#tt').datagrid('beginEdit', getRowIndex(target));  
}  
function deleterow(target){  
    $.messager.confirm('Confirm','Are you sure?',function(r){  
        if (r){  
            $('#tt').datagrid('deleteRow', getRowIndex(target));  
        }  
    });  
}  
function saverow(target){  
    $('#tt').datagrid('endEdit', getRowIndex(target));  
}  
function cancelrow(target){  
    $('#tt').datagrid('cancelEdit', getRowIndex(target));  
}  
}
```
