

ionic 上拉菜单(ActionSheet)

上拉菜单(ActionSheet)通过往上弹出的框，来让用户选择选项。

非常危险的选项会以高亮的红色来让人第一时间识别。你可以通过点击取消按钮或者点击空白的地方来让它消失。

实例

HTML 代码

```
<body ng-app="starter" ng-controller="actionsheetCtl" >

  <ion-pane>
    <ion-content >
      <h2 ng-click="show()">Action Sheet</h2>
    </ion-content>
  </ion-pane>
</body>
```

JavaScript 代码

在代码中触发上拉菜单，需要在你的 angular 控制器中使用 \$ionicActionSheet 服务：

```
angular.module('starter', ['ionic'])

.run(function($ionicPlatform) {
  $ionicPlatform.ready(function() {
    // Hide the accessory bar by default (remove this to show the accessory bar above the keyboard
    // for form inputs)
    if(window.cordova && window.cordova.plugins.Keyboard) {
      cordova.plugins.Keyboard.hideKeyboardAccessoryBar(true);
    }
    if(window.StatusBar) {
      StatusBar.styleDefault();
    }
  });
});

.controller( 'actionsheetCtl',['$scope','$ionicActionSheet','$timeout' ,function($scope,$ionicActionSheet,$timeout){
  $scope.show = function() {

    var hideSheet = $ionicActionSheet.show({
      buttons: [
        { text: '<b>Share</b> This' },

```

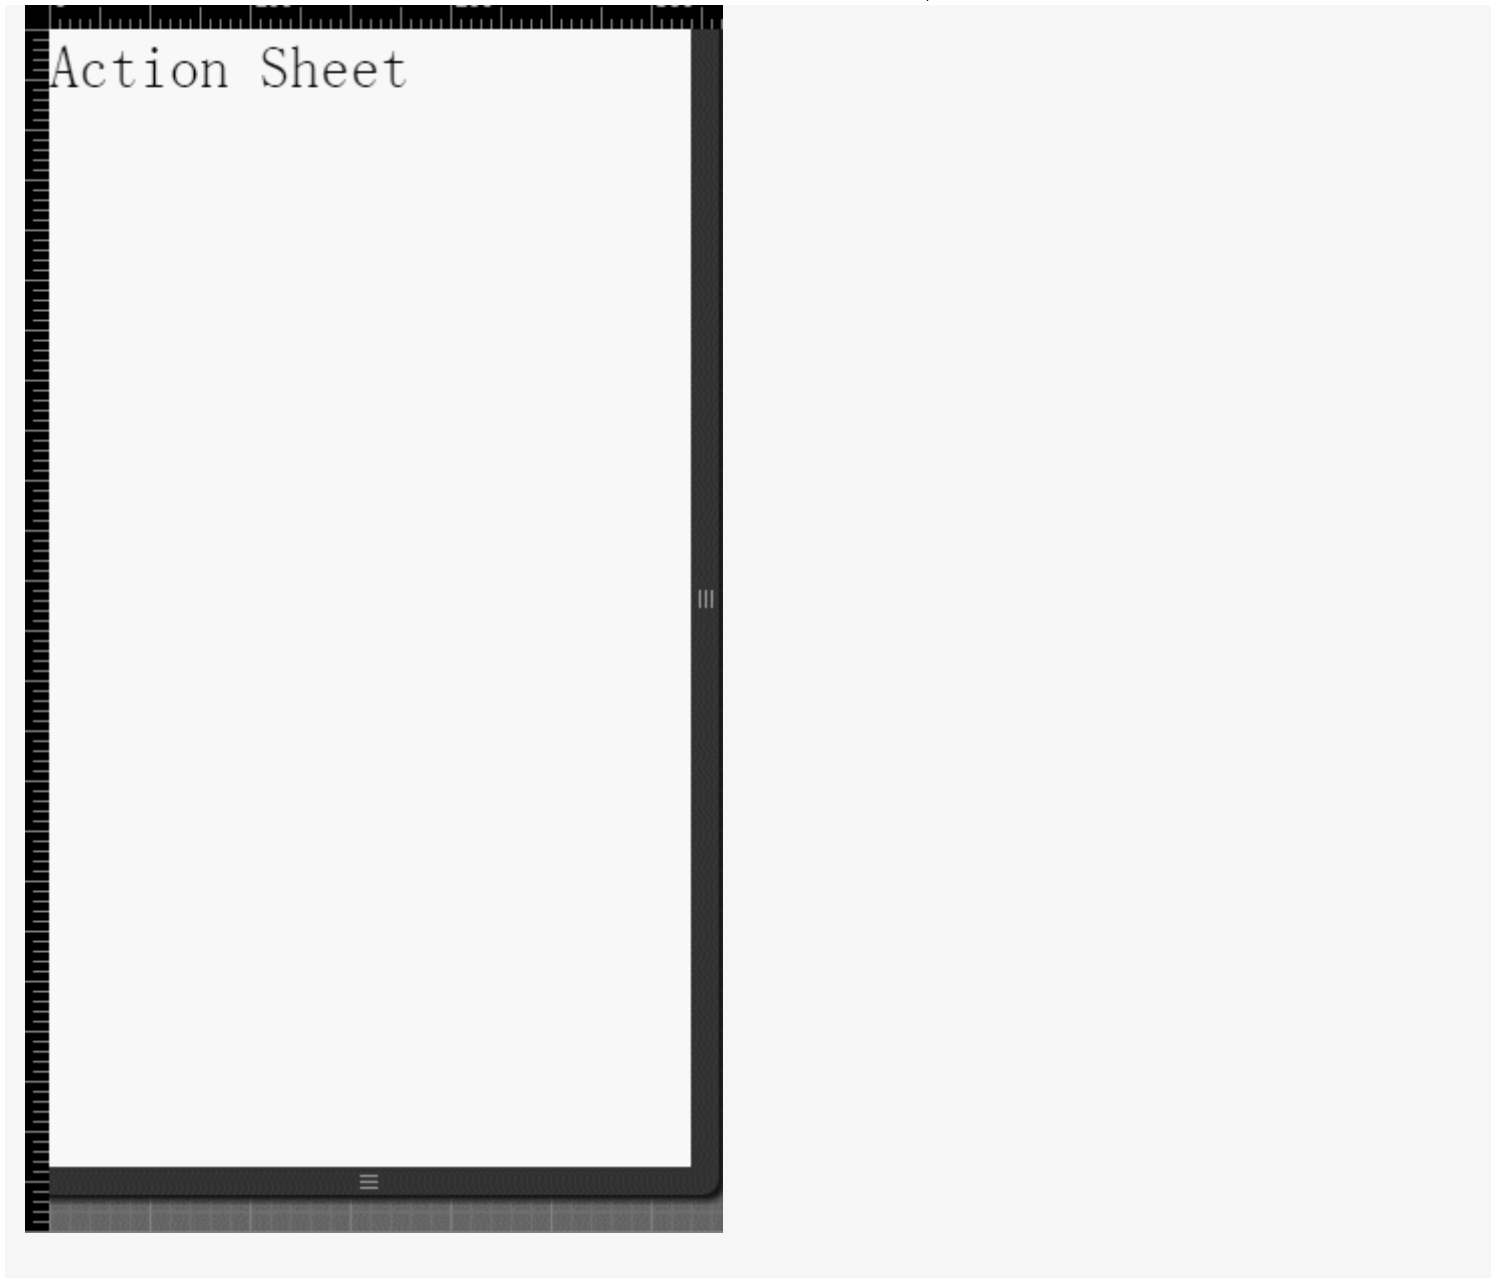

```
        { text: 'Move' }
      ],
      destructiveText: 'Delete',
      titleText: 'Modify your album',
      cancelText: 'Cancel',
      cancel: function() {
        // add cancel code..
      },
      buttonClicked: function(index) {
        return true;
      }
    });

    $timeout(function() {
      hideSheet();
    }, 2000);

  });
})
```

[尝试一下 »](#)

运行效果如下图：

← ionic icon(图标)

ionic 背景层 →
